PowerPoint), VS Code, XAMPP, Canva
- * Other IT Skills:**
Basic Computer Troubleshooting,
Data Encoding, Basic Networking

CERTIFICATES AND TRAINING

- * Introduction to Modern AI
- * IT Customer Support Basics
- * Digital Safety and Security Awareness

CAREER OBJECTIVE:

I am a Bachelor of Science in Information Technology (BSIT) student seeking an entry-level IT Staff / IT Support / Junior Developer position. I am eager to apply my knowledge in computer systems, programming, and technology to help your team and contribute to the company's growth. I am hardworking, willing to learn quickly, and ready to do my best in every task given to me.

ACADEMIC / CAPSTONE PROJECT:

Project Name: Barangay Management System

Role: System Developer & Programmer

Tools & Technologies Used:

- **Programming:** Java
- **Web Interface:** HTML, CSS
- **Database:** MySQL
- **Tools:** Visual Studio Code, XAMPP

Action & Result:

- **Purpose:** The system was built to make recording and managing barangay records faster and easier replacing manual writing in logbooks to avoid lost files and slow processing.
- **My Contribution:** I developed the database design, created the forms for adding/editing resident info, and wrote the code to connect the system to the database.
- **Outcome:** The system can now store resident records, issue clearance requests, and generate reports quickly. It is organized, easy to use, and reduced errors in recording data.
